THE PROJECT

BOOK

Vismara Design, a brand, a family, a great passion to design and a long tradition of wood working experience. From Brianza, the breating heart area of carpentry, Vismara Design has been producing furniture for more than 60 years by representing a constantly evolving reality, with a creative and motivated team behind it. Our deep experience and skill in furniture processing, is shown in this stunning catalogue which contains some of our worldwide completed projects. The Project book has been created and crafted exclusively for you. Enjoy the show!

INDEX

KEY STAGES OF A PROJECT

FIRST BRIEF

This is the very first step, which is however essential to approach the customer at best: it is a moment of mutual acquaintance and understanding of the respective needs, tastes and requests.

GENERAL MOOD

After a preliminary discussion with the customer, the general mood of the project starts to be outlined, focusing on style and making an initial selection of colour palettes and products.

DETAILED DRAWINGS

Starting from now, the project becomes executive, which means that a feasibility study is performed and the real spaces are measured and analysed. The aim is to perfectly adapt the general idea to the real concept.

MANUFACTURING

Following the final selection of the products, the manufacturing process can start. The raw materials, after being delivered to our craft workshop, starts to be worked so as to give shape to the final product. Once the latest details are checked up, the items are ready to leave our warehouse.

QUALITY CONTROL

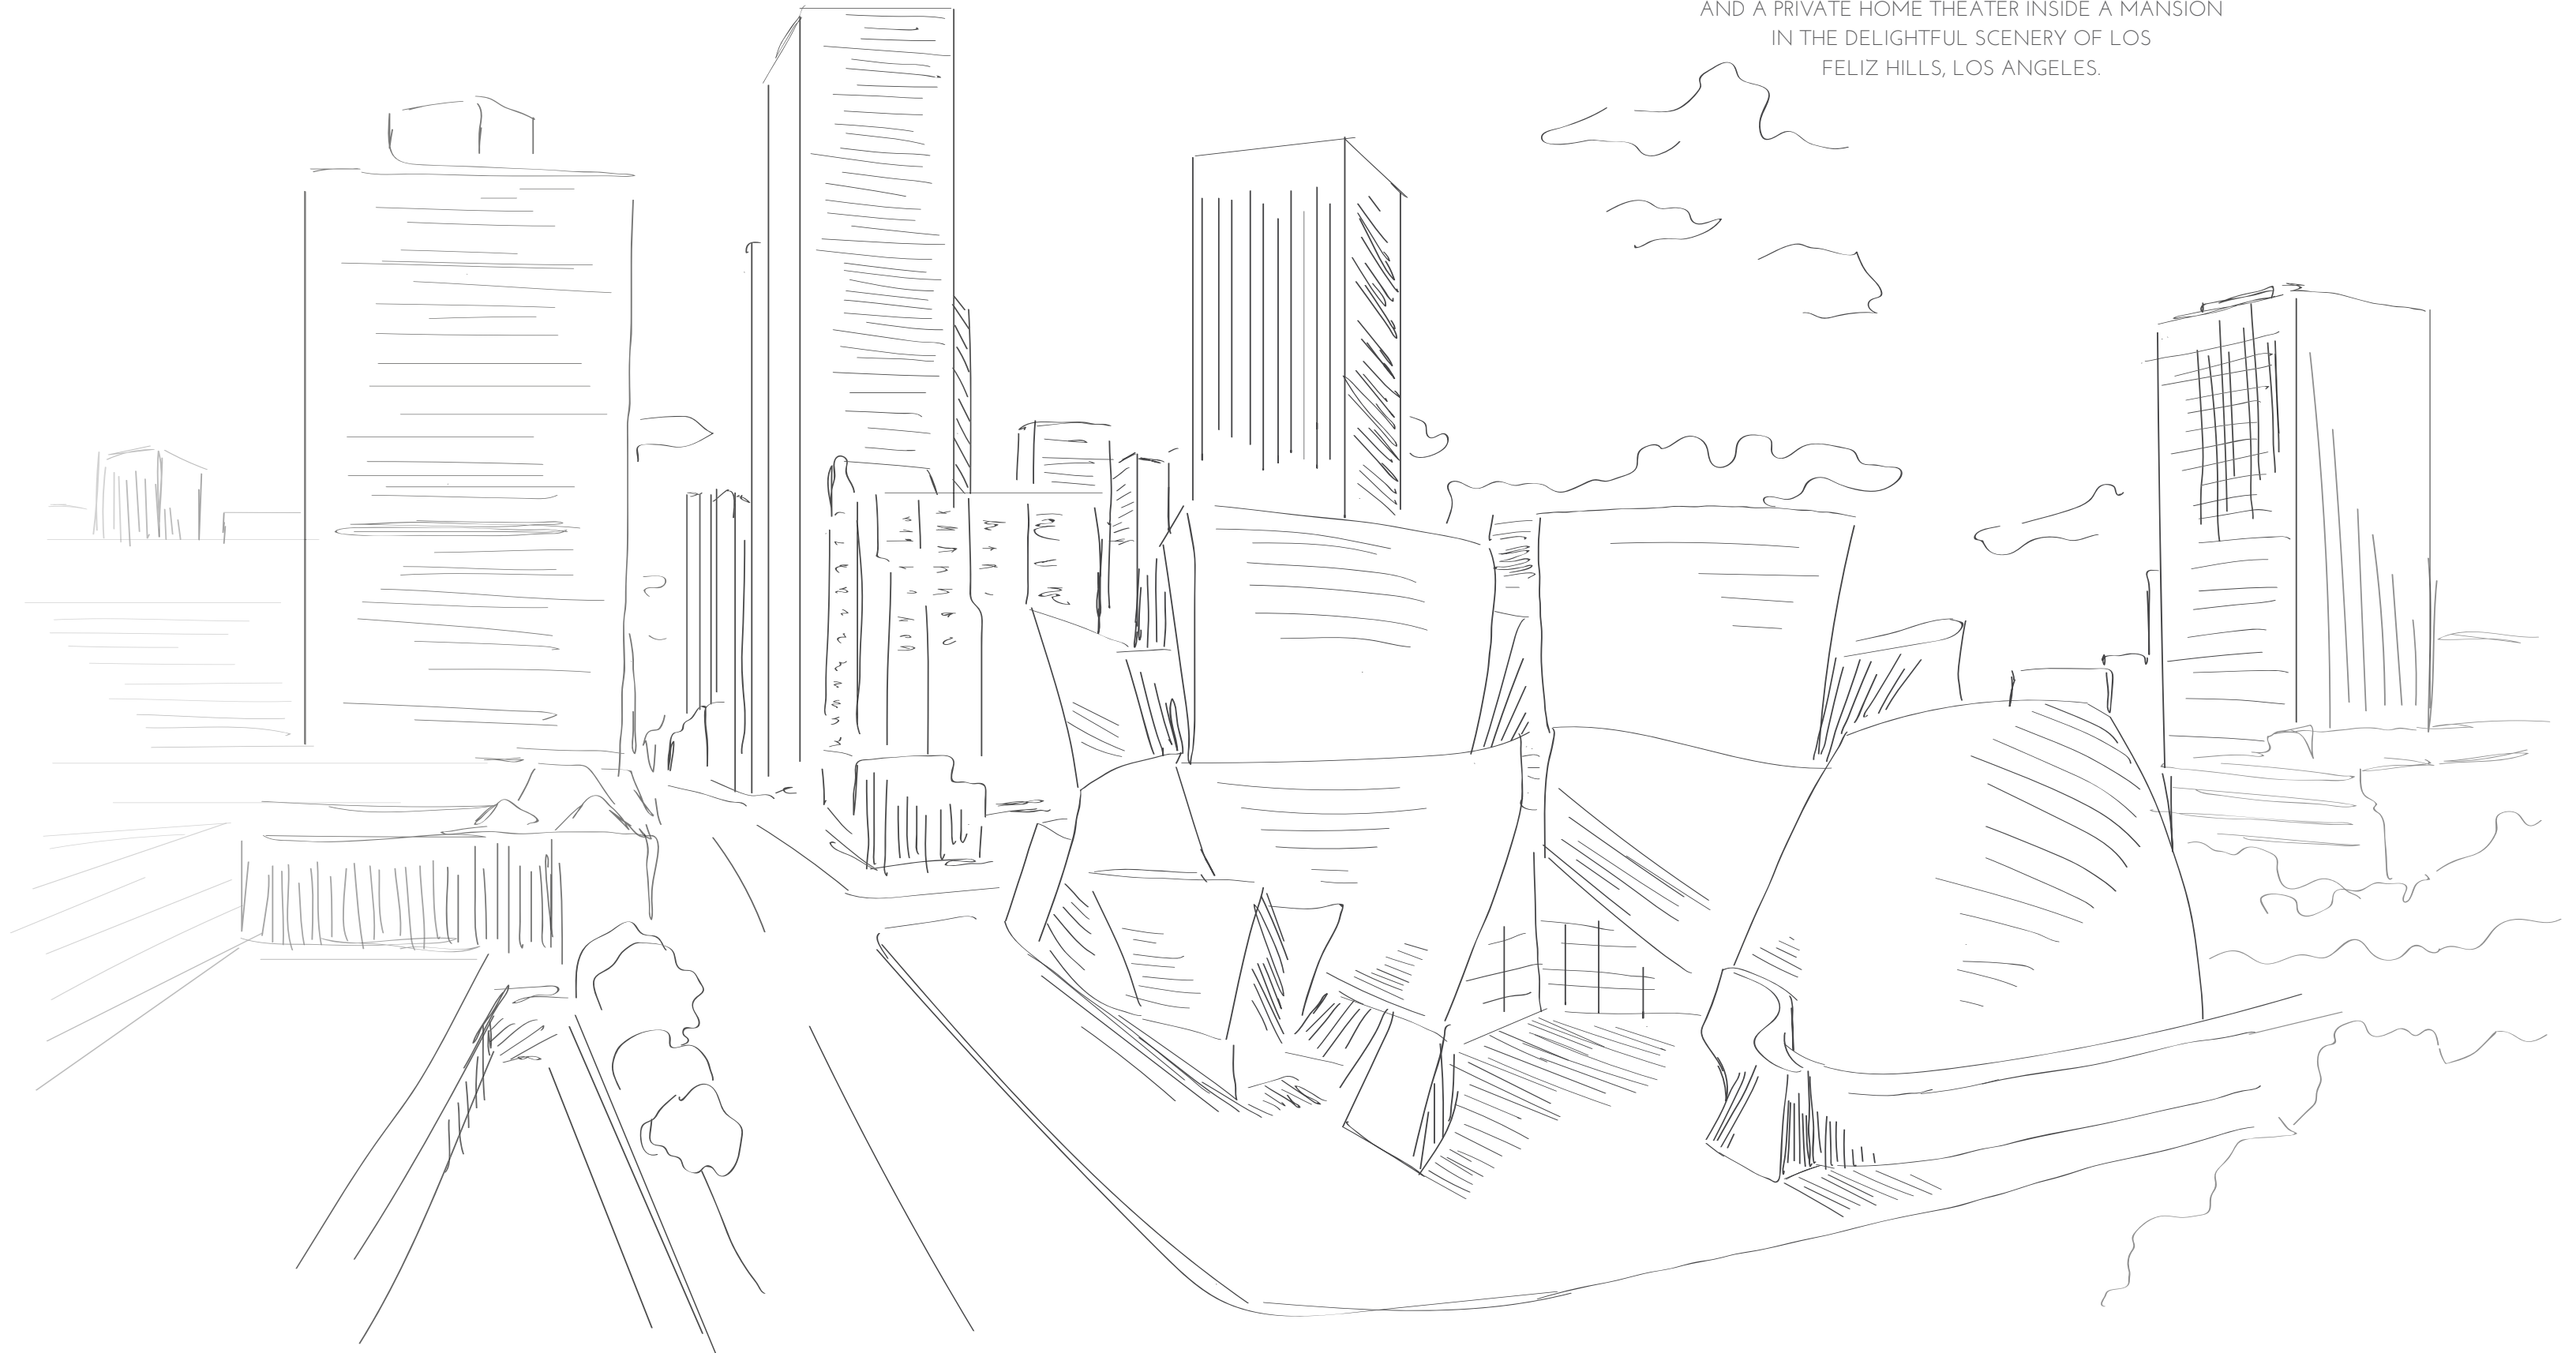

Last but not least, quality control: before leaving the warehouse, all the products are carefully examined to be manufactured in accordance with the highest standards and quality levels - which have always distinguished and marked Vismara products.
