NEWDE

Our professional Pool tables are the result of a long craft tradition, whose secrets have been developed and bequeathed for three generations. This artisanal work requires patience and considerable efforts and this is why only few experts and enthusiasts keep practising it today.

The structure of our Pool tables is made of solid wood: the first seasoning takes place in the wood dryer, while the second one occurs in our laboratory, where it is left to stand for at least one year, before processing it.

The external structure – legs and bumpers – is made of MDF, a peculiar material that provides the pool table with a perfect solidity.

What makes our Pool tables unique is a traditional albeit disused technique, namely the usage of 10 mm bolts with a clamping bush placed inside the bumper.

This is a method that requires more time, if compared with the more common use of external bolts. Through this mechanism our Pool tables ensure utmost tightness and excellent aesthetic results. As far as the surface is concerned, the use of slates is essential to grant perfect balance and maximum precision while playing pool. Slates come from Lavagna, a Ligurian city rich in this flat rock.

CIRCUS LIMITED EDITION

Vismara new Circus Edition draws inspiration from Surrealism and scientific illustrations. Vismara creatives painstakingly focused on studying and exploring European scientific books, which have become and represented essential tools for research development and the dissemination of knowledge about the natural world since the XVIII century. Surrealism is a cultural movement that began in the early 1920s, and it is best known for its visual artworks and writings.

The Surrealists try to portray and interpret the unconscious side of human mind as manifested while dreaming – a unique dimension where subjects can irrationally and creatively combine.

The union of two only seemingly distant worlds opens up to an imaginary universe, halfway between real and unreal, fantasy and nature. Vismara Design mixes rationality and irrationality to create something that wants to be contemporary, very fashionable and capable of linking the two opposites of fantasy and knowledge. As in an eccentric modern Wunderkammer, the Circus Edition takes you into an extraordinary universe where art and science live and blend together harmoniously.
