

A woman with blonde hair in a bun, wearing a dark top, sits on a white lounge chair on a rocky beach. Several other white lounge chairs are scattered around her. The ocean is in the background under a clear sky. The word "VONDOM" is overlaid in large white letters across the center of the image.

Outdoor Rugs

# Outdoor rug, by Studio Vondom

At Vondom, we continue to innovate and develop new techniques to come up with new and cutting-edge products. The result of these efforts is brought to life in outdoor rugs made from recycled plastic. These rugs are made for the outdoors; as they have UV treatment incorporated, they resist water and high temperatures, and they are also easy to clean and maintain. They are the perfect decorative complement; adding a warm and cosy touch to wherever you place them.

## Outdoor rugs made from recycled plastic

The new rugs come in a wide range of neutral shades and vibrant tones that blend perfectly with Vondom furniture finishes. Once again, the use of plastic fibres recovered from the oceans is part of our journey towards a more sustainable future. This time, we've used more than 130 plastic bottles for every square metre of rug. This is our grain of sand to help the marine ecosystem and the environment.

# Soft and fresh for outdoors

The new rugs are soft and fresh, as well as other very pleasant sensations to the touch that you'll also enjoy when sitting on ergonomic upholstery that will transport you to a place where wellbeing prevails.

These rugs are made for the outdoors; as they have UV treatment incorporated, they resist water and high temperatures, and they are also easy to clean and maintain.

They are the perfect decorative complement; adding a warm and cosy touch to wherever you place them.

## Social welfare

From our philosophy, under the name of Vondom Revolution, we are working for our creations, and all that around us, do not compromise the capacity of the future generations, and allow a balance between the economic growth, the environment and social welfare.

That's why sustainability is the key to the materials and complements choice. Our fabrics and rugs now contain recycled plastic fibers that contribute for a more sustainable future. This time, we've used more than 130 plastic bottles for every square metre of rug. This is our grain of sand to help the marine ecosystem and the environment.

# Stain-resistant treatment

At Vondom we offer rugs with extraordinary levels of performance, durability, and design. Tailored and approved to withstand the toughest outdoor conditions.

Stain-resistant treatment, waterproofing, resistance to UV rays, cold cracking, and mould spores, ensure that our furniture can be used in all outdoor spaces and areas with high levels of humidity and chlorine, such as spas and indoor swimming pools.

The engineered recycled material offers superior durability, making it well-suited to commercial and residential use.

# Cleaning and care

## Rugs: Features

	Fabric Tejido	Weight Peso	Flame Resistance Resist. Ignifuga	Use Uso	Color Fastness Solidez Del Color	Composition Composición	Maintenance Mantenimiento	Symbols Símbolos
<b>Eras.</b>		±2.600 gr/m2	DFIs1	Indoor and Outdoor	>6 (UV outdoor) 4 - ISO 105B04	100% Recycled PET	Clean with a cotton cloth with a solution of neutral soap or stain remover and water. Rub with a clean cloth or small soft bristle brush and allow to dry.	   
<b>Lares.</b>		±2.400 gr/m2	DFIs1	Indoor and Outdoor	>6 (UV outdoor) 4 - ISO 105B04	100% Recycled PET	Clean with a cotton cloth with a solution of neutral soap or stain remover and water. Rub with a clean cloth or small soft bristle brush and allow to dry.	   
<b>Pleita.</b>		±4.200 gr/m2	DFIs1	Indoor and Outdoor	>6 (UV outdoor) 4 - ISO 105B04	100% Recycled PET	Clean with a cotton cloth with a solution of neutral soap or stain remover and water. Rub with a clean cloth or small soft bristle brush and allow to dry.	   

**Colour, pattern and textural batch matching:** Slight differences will exist between different production batches and dyelots. Where a precise match is required, we recommend a stock cutting from the current material batch is requested before order placement.

**Maintenance:** Frequent vacuuming is a very effective and essential method of reducing the presence and accumulation of loose soil/dirt particles in the carpet.

**Cleaning:** Our carpets are very easy to maintain and clean without the need for specialised cleaning products, even allowing the use of bleach dilutions for more stubborn stains.

**Seaming and Joins in Flatweave Structures:** The cutting and seaming together of a flatweave is a precise and time consuming process with the resulting join likely to be variable in appearance. The durability of seams cannot be guaranteed in multi-width installations. For this reason we do not recommend either side to side or end to end joins in our flatweave structures.

**Installation on Stairs:** The stair nosing is a point of high friction and stair carpets must be installed in conjunction with a high quality heavy use underlay that covers the tread, nosing and riser.
